**7 Wk:**

### **Litter Overall:**

The Alaska litter overall is confident and self-assured. They show little to no stress in new situations; around new people or in circumstances that would typically be considered stressful. These puppies are curious and investigative with new sights and sounds including those that should be considered startling. These puppies have good motivation for interaction, food and toys at fairly equal and balanced levels. They also have good memory, focus and problem-solving abilities average to their age. These puppies are socially appropriate in their interactions with one another; with cats and with other dogs. They are also socially appropriate in their interactions with people. They are rarely vocal and rarely use their mouth to initiate or engage in play and have excellent bite inhibition when they do. These puppies have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. They are very consistent with very few differences between them. Any puppy in this litter has potential for therapy work. Individual puppy notes are listed below.

### **Individual Notes:**

She has mid level energy. She is confident, self-assured, and content to explore/play on her own. She is personable and affectionate; gentle with handling and interaction; playful, curious, social and engaging. She is motivated by interaction, food and toys. This puppy has no extremes in her temperament and she should adapt well to most any home.

### **Health notes:**

Red Dot has no health notes.
