Individual Notes:

The Caroline litter is a little immature, but this does not affect the results. Caroline Orange is confident and self assured. After having a little time to adjust in new situations, he shows little to no stress in new situations, around new people or in circumstances that would normally be considered stressful. He is curious and investigative with new sights and sounds, including those that would be considered startling. He has mid level energy. He is happy, bubbly, and social. He is personable, affectionate, playful, and curious. He has good memory, focus and problem-solving abilities above average for his age and stage of development. He is motivated for interaction, food, and toys at fairly equal and balanced levels. He is comfortable and tolerant of handling and restraint. He is also gentle and respectful with handling and interaction. He is socially appropriate in his interactions with his littermates, other dogs, cats, and people. He is rarely vocal and rarely uses his mouth to initiate or engage in play, but when he does, he has excellent bite inhibition. He has no red flags in his personality and shows no possessiveness. These puppies are very consistent with very few differences between them. They should do well in most any home.

Health notes:

Orange has undescended testicles.
