Individual Notes:

Everly green dot is confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that should be considered stressful. He reacts appropriately to new sights and sounds. He is also curious and investigates sights and sounds that should be considered startling. He has a good memory, focus, and problem-solving abilities average to his age and stage of development. He has very good motivations for interaction and food, but has average motivation for toys. He is socially appropriate in his interactions with litter mates, cats, other dogs, and with people. He does use his mouth to initiate or engage in play, but has excellent bite inhibition. He is rarely vocal. He is comfortable and tolerant of handling and restraint while actively seeking out this type of interaction. He can be a bit wiggly due to excitement. The Everly litter overall has no red flags and shows no possessiveness. They are very consistent with very few differences between them. They are all very engaging, interactive, playful, happy, bubbly, and curious. They are social and affectionate. These puppies are very similar when compared side-by-side.

Health notes:

Green Dot has no health notes.
