Individual Notes:

Nicholee litter overall is confident and self-assured, but a couple need a little time to adjust into a new situations. Pink shows little to no stress around new people, in new situations, or in situations that would typically be considered stressful. She has mid level energy. She is personable, playful, happy, and eager. She is social and engaging. She is the most engaging in her litter. She has a good memory, focus, and problem-solving abilities above average for her age. She has very good motivations for interaction, food, and toys. She is socially appropriate in her interactions with litter mates, other dogs, cats and dogs. She is rarely vocal. She also rarely uses her mouth to initiate or engage in play, but when she does,

she has excellent bite inhibition. She shows no red flags in her personality and shows no possessiveness. She is comfortable and tolerant of handling and restraint. These puppies are very similar with very few differences between them. These puppies are actually ready to be potty trained. Pink is well balanced and should adapt well to most any home that will be interactive with him. She has good potential for therapy work.

Health notes:

Pink has no health notes.
