Individual Notes:

Blanche Orange Dot is confident and self-assured after a little time to adjust into a new situation. He is curious and investigated with new sights and sounds, including those that would typically be considered startling. He has good memory focus and problem-solving abilities average to their age and stage of development. He also has good motivations for interaction, food, and toys. He is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. He does use his mouth to initiate or engage in play, but has very good bite inhibition. He is gentle with handling an interaction. This litter overall has no red flags, shows no possessiveness, and are rarely vocal. These puppies are fairly consistent with very few differences between them. They all have mid to moderate energy levels. They are all very personable, engaging, happy, and social. They are playful, curious, eager, and affectionate. Weight is a little immature but it does not affect the results of this test. These puppies are well balanced and would do best in a home that will be interactive and engaging with them.

Health notes:

Orange Dot has underbite.
