Individual Notes:

Hayden red is a little timid to start but will adjust if allowed. She shows some stress in new situations, around new people, and circumstances that are typically considered stressful. She will adjust very well and on her own. She reacts appropriately to new sights and sounds including those that would be considered startling. She has a good memory, focus, and problem-solving abilities average to her age and stage of development. She has good motivations for interaction, food, and toys at equal and balanced levels. She is socially appropriate in her interactions with litter mates, cats, other dogs, and with people. She is rarely vocal and she rarely uses her mouth to initiate or engage in play and interaction. When she does she has excellent bite inhibition. The litter overall have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies have mid-level energy. They are confident and self-assured after a little time to adjust into a new situation. They are playful, curious, eager, and affectionate. They are very gentle and respectful. The puppies are well balanced and should adapt well into most any home that will allow them to adjust without being overwhelmed.

Health notes:

Red has no health notes.
