Individual Notes:

Torrance pink is confident and self-assured but needs a little time to adjust into a new situation. She is a bit immature which is not unusual for a litter this large. She shows some stress in new situations, around new people, or in circumstances that are typically considered stressful. She does recover on her own fairly quickly. She reacts appropriately to new sights and sounds. She has a good memory, focus, and problem-solving abilities average for her age and stage of development. She has very good motivations for interaction, food, and toys. She is socially appropriate in her interactions with litter mates, cats, dogs, and with people. She is rarely vocal and really uses her mouth to initiate or engage in play. When she does she has excellent bite inhibition. The litter overall have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. Pink has mid to moderate energy. These puppies are social, curious, playful, and eager. They are personable and affectionate. They are gentle with handling an interaction. They are content to explore and play on their own. These puppies are well balanced and should adapt well into most any home.

Health notes:

Pink has no health notes.
