### **Individual Notes:**

Clara Pink Dot overall is very confident and self assured. She has mid to moderate energy. She shows little to no stress in new situations, around new people or in circumstances that are typically considered stressful. She is curious and investigative with new sights and sounds, including those that would typically be considered startling. She is very personable and engaging, actively working to get and keep your attention. She is social, happy, outgoing and personable. She is gentle with interaction and very affectionate. She has very good memory, focus and problem-solving abilities above average for her age and stage of development. She also has very good motivations for interaction with good interest in toys. She is socially appropriate in her interactions with her littermates, other dogs, cats and people. She is rarely vocal and rarely uses her mouth and when she does, she has excellent bite inhibition. She is comfortable and tolerant of handling, but can also be a little wiggly and excited. She has no red flags in his personality and shows no possessiveness. Overall, these puppies are very consistent with very few differences between them. These puppies are well balanced and should adapt well into most any home, but would do best in a home that is going to be interactive with them. Pink Dot has potential for therapy work.

### **Health notes:**

Pink Dot has no health notes.
