Individual Notes:

Genevieve orange is confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that would typically be considered stressful. He reacts appropriately to new sights and sounds. He is curious and investigative with sights and sounds that would typically be considered startling. He has a good memory, focus, and problem-solving abilities for his age and stage of development. He has good motivations for interaction and toys. He has average motivation for food. He is socially appropriate in his interactions with litter mates, cats, dogs, and with people. He is vocal when trying to get attention but it is socially appropriate and easily managed. He rarely uses his mouth to initiate or engage in play, but has excellent bite inhibition when he does. He has no red flags and shows no possessiveness. He is comfortable and tolerant of handling and restraint, while actively seeking out these interactions. The Genevieve litter overall are very consistent. They are all playful, curious, personable, and engaging. They are gentle with handling and interaction. Any puppy in this litter has potential for therapy work. Orange has mid-level energy and needs a little time to adjust into a new situation. The puppies are well balanced and should adapt well to most any home that will allow them to adjust without being overwhelmed.

Health notes:

Orange has no health notes.
