Individual Notes:

Tesla pink is confident and self-assured. She shows no stress around new situations, around new people, or in circumstances that are typically considered stressful. She reacts appropriately to new sites and sounds. This includes those sites and sounds which would typically be considered startling. She is curious and investigative. She has good memory, focus, and problem-solving abilities average for her age and stage of development. She also has good motivations for interaction, food, and toys at fairly equal and balanced levels. She is socially appropriate in her interactions with litter mates, cats, other dogs, and with people. She rarely uses her mouth and has excellent bite inhibition when she does. She is also rarely vocal. The litter overall have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. All these puppies are very consistent with very few differences between them. They all have mid to moderate energy. They are bubbly, happy, social, and eager. They are engaging, curious, personable and affectionate. Each puppy in this litter has potential for therapy work. The puppies would do best in a home that will be interactive with them.

Health notes:

Pink's teeth are not all the way in yet.
