### **Individual Notes:**

Merriam Blue overall is very confident and self-assured. He has mid to moderate energy. He is very consistent. He is the most independent in the group, but he is still very personable and engaging. He prefers to be with people rather than to be alone, but is still content to explore and play on his own. He is social, happy, bubbly, and playful. He is also eager, affectionate and well balanced. He shows no stress in new situations, around new people or in circumstances that would typically be considered stressful. He is curious and investigative of new sights and sounds, including those that are startling. He has very good focus for his age as well as a good memory and problem-solving abilities above average for his age. He has excellent motivations for interaction with good motivations for food and toys. He is socially appropriate in his interactions with with his littermates, other dogs, cats and people. He has very good bite inhibition. If he uses his mouth, it is just to initiate or engage in play. He is vocal in socially appropriate situations, but it is easily managed and redirected. It seems almost chatty. He has no red flags in his personality and shows no possessiveness. Blue Dot has very good potential for therapy work. These puppies should do well in most any home, but would do best in a home that is going to be interactive with them.

### **Health notes:**

Blue has no health notes.
