**Individual Notes:**

Merriam Pink Dot overall is very confident and self-assured. She has mid to moderate energy. She is very consistent. She is also very personable and engaging. She prefers to be with people rather than to be alone, but is still content to

explore and play on her own. She is social, happy, bubbly, and playful. She is also eager, affectionate and well balanced. She shows no stress in new situations, around new people or in circumstances that would typically be considered stressful. She is curious and investigative of new sights and sounds, including those that are startling. She has very good focus for her age as well as a good memory and problem-solving abilities above average for her age. She has excellent motivations for interaction with good motivations for food and toys. She is socially appropriate in her interactions with with her littermates, other dogs, cats and people. She has very good bite inhibition. If she uses her mouth, it is just to initiate or engage in play. She is vocal in socially appropriate situations, but it is easily managed and redirected. It seems almost chatty. She has no red flags in his personality and shows no possessiveness. Pink Dot has very good potential for therapy work. These puppies should do well in most any home, but would do best in a home that is going to be interactive with them.

## **Health notes:**

Pink Dot has no health notes.
