Individual Notes:

Martha blue is very confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that would be considered stressful. He is curious and investigative with new sites and sounds. He is also curious and investigative with sights and sounds that are startling. He has a very good memory, focus, and problem-solving abilities for his age and stage of development. He has good motivations for interaction, food, and toys at fairly equal and balanced levels. He is already showing an inclination towards being ready for potty training. He is socially appropriate in his interactions with litter mates, cats, and other dogs. He can be wiggly in his effort to get attention, but otherwise is socially appropriate in his interactions with people. He is gentle. He is comfortable and tolerant of handling and restraint. He is rarely vocal and rarely uses his mouth. When he does use his mouth to initiate or engage in play he has an excellent bite inhibition. The litter overall have no red flags and show no possessiveness. They have mid to moderate energy. They are very personable and engaging. They are bubbly, happy, social, and eager. These puppies actively work together and keep your attention, but are also content to explore and play on their own. They are social, curious, affectionate and interactive. These puppies are well balanced and should adapt well into most any home. They do have good potential for therapy work.

Health notes:

Blue has no health notes.
