Individual Notes:

Tatiana white is very confident and self-assured. She shows no stress in new situations, around new people, or in circumstances that would typically be considered stressful. She is curious and investigative with new sites and sounds including those that should be startling. She has very good focus and problem-solving abilities for her age and stage of development. She also has a good memory. She has excellent motivations for interaction, food, and toys. She should be very easy to train and work. She is socially appropriate in her interactions with litter mates, cats, and other dogs. She is also socially appropriate in her interactions with people, although can be a little pushy in her effort to get or keep your attention but this is easily managed and redirected. She does use her mouth quite a lot for interaction and play, but has a good bite inhibition. She is rarely vocal. The litter overall have no red flags and show no possessiveness. These puppies are all comfortable and tolerant of handling and restraint, although can be a little wiggly at times due to excitement. These puppies have mid to moderate energy. They are very social, curious, inquisitive and eager. They are engaging, interactive, and very affectionate. Any puppy in this litter has potential for therapy work. These puppies are content to explore and play on their own but definitely prefer to be with and around people. These puppies are very similar with very few differences between them. Differences will become more noted as the puppies grow and learn as their life experiences are different. For now there is very little differences in the individual personalities of each puppy. These puppies are well balanced and should do well in most any home but would do best in a home that is going to be interactive with them.

Health notes:

White has no health notes.
