Individual Notes:

Martina white is confident and self-assured. She shows little to no stress in new situations, around new people, or in circumstances that would typically be considered stressful. She is curious and investigative with new sites and sounds, including those that would be considered startling. She has a good memory, focus, and problem-solving abilities average for her age and stage of development. She has very good motivation for interaction and good motivations for food and toys. She is socially appropriate in her interactions with litter mates, cats and with other dogs. She is also socially appropriate in her interactions with people. She is rarely vocal and rarely uses her mouth to initiate or engage in play. If she does use her mouth, she is gentle and has excellent bite inhibition. She is comfortable and tolerant of handling and restraint. She actively seeks out this type of interaction. The litter overall have no red flags and show no possessiveness. This litter is very consistent with very few differences between individual puppies. These differences will become more noted as life experiences change and learning occurs. These puppies all have mid to moderate energy. They are very personable and engaging. They are social, happy and curious. They are gentle and respectful with handling an interaction. They are content to explore and play on their own, but prefer to be with and around people. Any puppy in this litter has good potential for therapy work. They are very engaging and eager to please. These puppies would do best in a home that is going to be interactive with them.

Health notes:

White has no health notes.
