#### **Individual Notes:**

Skylar Pink is a little timid to start, but does adjust very well and on her own. She shows a little stress a new situations, and a little stress in circumstances that could be considered stressful, like grooming, etc. She shows no stress around new people. This puppy is curious and investigative of new sights and sounds, including those that should be considered startling. This puppy has a good memory, and problem-solving abilities average to her age and stage of development. Her focus is a little all over the place, which can be totally normal at this age. Pink has very good motivations for interaction, food, and toys at fairly equal and balance levels. She is socially appropriate in her interactions with littermates, with cats, and with other dogs. She is also socially appropriate in her interactions with people. She does use her mouth to initiate or engage in play, but has very good bite inhibition. She is rarely vocal.

Overall, the Skylar litter has no red flags and shows no possessiveness. They are comfortable, tolerant, and gentle with handling and restraint. They are very consistent with very few differences between them. These puppies all have mid to moderate energy. They are very bubbly, social, happy, and playful. They are curious and well-balanced. They are personable and affectionate. These puppies will adapt well into most any home.

#### **Health notes:**

Pink has no health notes.
