**7 Wk:**

**Individual Notes:**

Torrance red is confident and self-assured, although she may need a little time to adjust into a new situation. She is curious and investigative of new sites and sounds, including those that should be considered startling. She shows little to no stress in new situations, around new people, or in circumstances that would typically be considered stressful. She has a good memory, focus, and problem-solving abilities above average for her age and stage of development. She also has very good motivations for interaction, food and toys at fairly equal and balanced levels. She is socially appropriate in her interactions with litter mates, cats, and with other dogs. She is also socially appropriate in her interactions with people. She rarely uses her mouth to initiate or engage in play, and has excellent bite inhibition if she does. Red is vocal in socially appropriate situations, but it is easily managed and or redirected. She has mid-level energy. The litter overall have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies are fairly consistent with very few differences between them. They are all social, happy, curious and engaging. They are personable and affectionate. They are gentle with handling and interaction. These puppies are well balanced, and should adapt well into most any home.

## **Health notes:**

Red has no health notes.
