Individual Notes:

Chelsea pink is confident and self-assured. She shows no stress in new situations, around new people, and circumstances that are typically considered stressful. She is curious and investigative with new sites and sounds, including those that should be considered startling. She has a good memory, focus and problem-solving abilities above average for her age and stage of development. She has very good motivations for interaction, food, and toys at fairly equal and balanced levels. She is socially appropriate in her interactions with litter mates, cats, and with other dogs. She is also socially appropriate in her interactions with people. She does use her mouth to initiate or engage in play, but has very good bite inhibition. Pink is rarely vocal. She has mid to moderate energy. The litter overall have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies are fairly consistent with very few differences between them. Differences will become more pronounced as this litter has different learning and social experiences. They are all playful curious, social, and happy. They are content to explore and play on their own, but prefer to be with and around people. The rest of the litter is personable, affectionate, well balanced and should adapt well into most any home.

Health notes:

Pink has no health notes.
