## **Individual Notes:**

Clementine blue is confident and self-assured. He shows little to no stress in new situations, around new people, or in circumstances that are typically considered stressful. He react appropriately to new sites and sounds, including those that are startling. He is curious and investigative. He has a good memory, focus, and problem-solving abilities above average for his age and stage of development. He has excellent motivation for interaction, food and toys. He is socially appropriate in his interactions with litter mates, cats, and with other dogs. He is also socially appropriate in his interactions with people. He is naturally gentle and respectful. He is very sweet. He has excellent bite inhibition if he uses his mouth to initiate or engage in play, which is rare. He is also rarely vocal. The litter overall have no red flags and show no possessiveness. They are comfortable and tolerant of handling and restraint. These puppies actively seek out this type of interaction. These puppies all have mid-level energy. They are very consistent with very few differences between them. Individual personality traits will become more defined and pronounced as they have different learning and socialization experiences. These puppies are all curious, playful, happy and social. They are content to explore and play on their own, but prefer to be with an around people. They are very personable and affectionate. They are eager and engaging. Blue is a good therapy candidate. These puppies are all well balanced and will do best in a home that is going to be interactive with them.

## **Health notes:**

Blue has no health notes.
