Individual Notes:

Faryn Blue Dot is confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that are typically considered stressful. He is curious and investigative of new sights and sounds including those that would be considered startling. This puppy has good memory focus and problem-solving abilities average for his age and stage of development. He has good motivations for interaction, food, and toys at balance and equal levels. He is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. He does use his mouth to initiate and engage in play, but has very good bite inhibition. Blue Dot is vocal, but only in socially appropriate situations, and it seems easily managed and redirected.

Overall, the Faryn litter has no red flags and shows no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies are very consistent with very few differences between them. These differences will become more pronounced as they have different life and learning experiences. These puppies all have moderate energy. They are confident, curious, social and happy. They are bubbly and playful. They are very personable, engaging, affectionate, and eager. They are also content to explore and play on their own. These puppies are well balanced, and should adapt well into most any home setting.

Health notes:

Blue Dot has no health notes.
