Individual Notes:

Kassandra blue is confident and self-assured. Although he may need a little time to adjust into a new situation, he is curious and investigative of the sites and sounds, including those that should be considered startling. He has a good memory, focus, and problem-solving abilities above average for his age and stage of development. He also has excellent motivations for interaction and food. He has good motivation for toys. He is socially appropriate, in his interactions with litter mates, cats and with other dogs. He is also socially appropriate in his interactions with people. He rarely uses his mouth and has excellent bite inhibition if he does. He is rarely vocal. Blue has moderate to mid-level energy. The litter overall have no red flags and show no possessiveness. These puppies are all comfortable and tolerant of handling and restraint. They are very consistent with subtle differences between them. These differences will become more pronounced as they have different learning and growing experiences. They can be a little timid to start, but do adjust very well and on their own. They are gentle and respectful with interactions. The entire litter is bubbly, happy, social, and engaging. They are eager, personable, and affectionate, while still being content to explore and play on their own. These puppies are well balanced and should adapt well into most any home.

Health notes:

Blue has no health notes.
