Individual Notes:

Kassandra pink is confident and self-assured. Although she may need a little time to adjust into a new situation, she is curious and investigative of the sites and sounds, including those that should be considered startling. She has a good memory, focus, and problem-solving abilities above average for her age and stage of development. She also has excellent motivations for interaction and food. She has good motivation for toys. She is socially appropriate, in her interactions with litter mates, cats and with other dogs. She is also socially appropriate in her interactions with people. She rarely uses her mouth and has excellent bite inhibition if she does. She is rarely vocal. Pink has moderate to mid-level energy. The litter overall have no red flags and show no possessiveness. These puppies are all comfortable and tolerant of handling and restraint. They are very consistent with subtle differences between them. These differences will become more pronounced as they have different learning and growing experiences. They can be a little timid to start, but do adjust very well and on their own. They are gentle and respectful with interactions. The entire litter is bubbly, happy, social, and engaging. They are eager, personable, and affectionate, while still being content to explore and play on their own. These puppies are well balanced and should adapt well into most any home.

Health notes:

Pink has no health notes.
