Individual Notes:

Emersyn Blue is very confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that are typically considered stressful. This puppy reacts appropriately to new sights and sounds, he is curious and investigative. This includes those sights and sounds that could be considered startling. He has outstanding memory, focus, and problem-solving abilities for his age and stage of development. He also has very good motivations for interaction, food, and toys at fairly equal and balanced levels. Blue is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. This puppy is rarely vocal. He does use his mouth quite a lot to initiate and engage in play, but has excellent bite inhibition. Blue has mid-level energy. He is comfortable and tolerant of handling and restraint. He can be a little pushy, but it seems easily managed and redirected.

Overall, the Emersyn litter has no red flags and shows no possessiveness. They are fairly consistent, with some differences between them. These differences will become more pronounced as they have different learning and social experiences. They do get excited, as any puppy can, but tend to level out fairly quickly. These puppies are all very personable, engaging, social, and happy. They are bubbly, eager, personable, and affectionate. Any puppy in this litter has potential for therapy work. They all have motivations that should make training relatively easy. These puppies are well balanced, and should adapt well into most any home

Health notes:

Blue has no health notes.
