Individual Notes:

Mercedes red dot is confident and self-assured after a little time to adjust into a new situation. She shows little to no stress in new situations, around new people, or in circumstances that are typically considered stressful. She needs a little more time to adjust than the rest of the litter, but still adjust very well and on her own. She is curious and investigative with new sites and sounds, including those that should be considered startling. She has excellent memory, focus, and problem-solving abilities above average for her age and stage of development. She also has very good motivations for interaction and good motivation for food and toys. She is socially appropriate in her interactions with litter mates, cats and with other dogs. She is also socially appropriate in her interactions with people. She has no red flags and shows no possessiveness. She is comfortable and tolerant of handling and restraint. She does use her mouth to initiate or engage in play, but has excellent bite inhibition. She is rarely vocal. She can be a little timid to start, but will adjust very well on her own. Red Dot has mid-level energy. She has good potential for therapy work. These puppies are all content to explore and play on their own, but prefer to be with an around people. They are very personable and affectionate, eager and engaging. They are happy, social, bubbly, and curious. These puppies are well balanced and should adapt well into most any home but will do best in a home that is going to be interactive with them.

Health notes:

Red Dot has no health notes.
