Individual Notes:

Briton Blue is a little timid to start, but does adjust very well on his own if allowed. After a little time to adjust into new settings, he shows little to no stress in new situations, around new people, or in circumstances typically considered stressful. This puppy is socially appropriate in his responses to new sights and sounds, including those that should be considered startling. He is curious and investigative. He has a good memory, focus, and problem-solving abilities average to his age and stage of development. He also has good motivations for interaction, food, and toys at fairly equal and balance levels. Blue is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. He rarely uses his mouth to initiate or engage and play, and has excellent bite inhibition if he does. Blue is rarely vocal. He has mid-level energy, and is naturally respectful. He is very gentle and sweet with his interactions. This puppy is very personable and engaging. He is content to explore and play on His own, but prefers to be with and around people. He has no red flags and shows no possessiveness. Blue is comfortable and tolerant of handling and restraint. He'll do best in a home that will allow him to adjust to new things without being overwhelmed.

Health notes:

Blue has no health notes.
