Individual Notes:

Sesame Red overall is a little timid to start, but does adjust very well on her own. She shows a little stress in new situations, but no stress around new people, or in circumstances typically considered stressful, like grooming. She reacts appropriately to new sights and sounds, being curious and investigative. She has good motivations for interaction, food and toys at fairly equal and balance levels. She also has a good memory, focus and problem-solving abilities average to her age and stage of development. Red is socially appropriate in her interactions with one another, cats and with other dogs, she is also socially appropriate in her interactions with people, and tends to be very gentle. She is comfortable and tolerant of handling and restraint. Red has no red flags and show no possessiveness. She has mid-level energy.

The Sesame litter overall are fairly consistent with very few differences between them. They are playful, curious, social and happy. They are content to explore and play on their own, while still being very personable and engaging. They are gentle and affectionate, these puppies will do best in a home that will allow them to adjust to new things without being overwhelmed, but are very well balanced and should adapt well into most any home. These puppies will likely fade.

Health notes:

Red has no health notes.
