Individual Notes:

The Chanel litter overall is confident and self-assured although a couple of puppies needed a little time to adjust into a new situation, they showed little to no stress in new situations, around new people, or circumstances that are typically considered stressful. They are curious and investigative new sites and sounds, including those that are startling. They have a good memory focus and problem-solving abilities average to their age and stage of development. They also have very good motivation for treats, and excellent motivation for interaction. Chanel Blue has moderate energy. These puppies are all very personable and engaging and while content explore and play on their own would prefer to be with and around people. These puppies are bubbly, happy, silly and social. They are eager and engaging, they are quite excitable for interaction after a little time to adjust to a new situation. They can be a little timid to start in need to be able to adjust without being overwhelmed these have potential for therapy work, if worked with in a way that builds their confidence to new things

Health notes:

Chanel Blue has no health notes
