Individual Notes:

Delores Green is confident and self-assured. He does need a little time to adjust into a new situation, but he does adjust very quickly and on his own. This puppy is curious and investigative with new sights and sounds, including those that could be considered startling. He shows little to no stress in new situations, around new people, or in circumstances that would typically be considered stressful. He has very good memory focus and problem-solving abilities at above average levels for his age. He has excellent motivations for interaction, food, and toys all at fairly equal and balanced levels. This puppy is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. He rarely uses his mouth to initiate or engage in play, and has excellent bite inhibition if he does. He is rarely vocal. Green skews more towards being naturally gentle and respectful. He is very calm and tolerant of handling and restraint. He has mid-level energy.

Overall, the Delores litter has no red flags and shows no possessiveness. This litter is very consistent with very few differences between the individual puppies. As they grow and have different learning experiences, we will see the differences become more pronounced. Any puppy in this litter has good potential for therapy work. These puppies are content to explore and play on their own, but prefer to be with and around people. They are very eager, personable, and affectionate. They are engaging and people oriented. These puppies are curious, social, happy, and playful. This litter is very well balanced, and should adapt well into most any home. But, they will do best in a home that is going to be interactive with them.

Health notes:

Green has no health notes.
