Individual Notes:

Sage red is confident and self-assured. She shows little to no stress in new situations, around new people, and circumstances typically considered stressful. She is curious and investigative with new sites and sounds, including those that would typically be considered startling. She has a good memory, focus and problem-solving abilities average to her age and stage of development. She has excellent motivations for interaction, food, and toys at fairly equal and balanced levels. She is socially appropriate in her interactions with litter mates, cats and with other dogs. She is also socially appropriate in her interactions with people. She has no red flags and shows no possessiveness. She is rarely vocal. She does use her mouth to initiate or engage in play but has excellent bite inhibition. The litter overall does actively work to get and keep your attention. They are all comfortable and tolerant of handling and restraint. These puppies are fairly consistent with subtle differences between individuals. Red has mid to moderate energy. She is naturally a little more gentle. She actively works to get and keep your attention and would rather be with people than to be alone. However, she is still content to explore and play on her own. She will do best in a home that is going to be interactive with her. The entire litter is playful, curious, social and happy. They are personable and engaging. They are bubbly, silly and well-balanced. They should adapt well into most any home.

Health notes:

Red has no health notes.
