Individual Notes:

Khloe White is confident and self-assured, after a little time to adjust. She shows little to no stress in new situations, around new people or in circumstances typically considered stressful. She is curious and investigative with new sites and sounds. She is eager to check new things out, including things that should be considered startling. She has very good memory and problem-solving abilities above average for her age and stage of development. Her focus is average to her age and stage of development. She has excellent motivation for interaction and good motivation for toys and food. She is socially appropriate in her interactions with her littermates, cats, other dogs and people. She does use her mouth to initiate or engage in play, but has very good bite inhibition. The boys do use their mouth a little more than the girls do. She is rarely vocal. White has moderate level energy.

Overall this litter had no red flags and show no possessiveness. These puppies are playful, curious, bubbly, social and happy. They are content to explore and play on their own, but would prefer to be with and around people. This litter overall has very good potential for therapy work, they prefer to be engaged. They are personable and affectionate. They are gentle and respectful with handling an interaction. These puppies are well balance, but will do best in a home that is going to be interactive with them.

Health notes:

White has no Health Notes.
