Individual Notes:

Emersyn Blue is confident and self-assured. He shows no stress in new situations, around new people, or in circumstances that are typically considered stressful. Blue is curious and investigative of new sights and sounds, including sights and sounds that could be considered startling. He also has excellent motivations for interaction, food, and toys. Green is socially appropriate in his interactions with littermates, cats, other dogs and people. Blue is rarely vocal. He does use his mouth quite a lot to get or keep your attention but has excellent bite inhibition. Blue is comfortable and tolerant of handling and restraint. Blue is content to explore and play on his own without being overly independent. He should adapt well in most any home.

Overall, the Emersyn litter has no red flags and shows no possessiveness. They are fairly consistent, with very few differences between them. They all have mid to moderate energy. All of these puppies are curious, playful, social, and happy. They are bubbly, personable and eager. This litter has very good memory, focus, and problem-solving abilities above average for their age and stage of development, especially Green Dot & Orange Dot.

Health notes:

Blue has no health notes.
