Individual Notes:

Susan Red Dot is confident and self-assured. She shows no stress in new situations, around new people, or in circumstances that are typically considered stressful. She has good memory, focus, and problem-solving abilities average for her age and stage of development. She also has good motivation at fairly equal and balanced levels for interaction, food, and toys. She is curious and investigative with new sights and sounds, including those that may be considered startling. Red Dot is socially appropriate in her interactions with his littermates, cats, other dogs and people. Red Dot is rarely vocal. She rarely uses her mouth to initiate or engage in play, but has excellent bite inhibition if he does. Red Dot has good potential for therapy work, she prefers to be with and around people.

The litter overall has no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies are very consistent with very few differences between them. They all have mid level energy. They are all personable and affectionate. They are content to explore and play on their own without being overly independent. These puppies are well-balanced and should adapt well into most any home environment.

Health notes:

Red Dot has no health issues.
