Individual Notes:

Sedona Red Dot is a little timid to start, but adjust on her own, if allowed. She shows little to no stress in new situations, around new people or in circumstances typically considered stressful. She reacts appropriately to new sites and sounds, including those that should be considered startling. She is curious and investigate. Red Dot is socially appropriate in her interactions with her littermates, cats, other dogs and people. She does use her mouth some to initiate or engage in play, but has excellent bite inhibition. She is rarely vocal. She has good memory, focus and problem-solving abilities average to her age and stage of development. She has very good motivations for interaction and food. She has good interest in toys. Red Dot has mid level energy. She should do well in most any home but will do best in the home that is going to allow her to adjust on her own. Overall, these puppies have no red flags and show no possessiveness. They are fairly consistent. Differences are only noted when comparing them side-by-side, but will become more pronounced as they have different learning and socialization experiences. They are personable and engaging. They are curious, social and happy. They are gentle with handling and interaction.

Health Notes:

Sedona Red Dot has no health notes.
