### 7 Wk:

#### Individual Notes:

The Colleen litter overall is confident and self-assured. They show no stress around new people, in new situations or in circumstances that are typically considered stressful. They are curious and investigative of new sites and sounds. These puppies have excellent motivation for food and good motivation for interaction and toys. These puppies are socially appropriate in their interactions with one another, cats, people and other dogs. They are rarely vocal. They do use their mouth to initiate or engage and play, but have very good bite inhibition. Blue Dot is a little more mouthy than the rest of the litter and a little more engaged. This is his effort to get and keep your attention, it is easily managed and redirected. Blue Dot has moderate level energy.

These puppies have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. These puppies are very consistent with very subtle differences. They are very personable and engaging while still being content to explore and play on their own. These puppies are well balanced. These puppies are bubbly, happy, eager and playful. They should adapt well into most any home

#### Health notes:

Blue Dot has no health notes
