### **7 Wk: Individual Notes:**

The Tiffany litter overall is confident and self-assured. They show no stress in new situations, around new people, or in circumstances typically considered stressful. They react appropriately to new sites and sounds. They are curious and investigative. Pink has excellent motivations for interaction, food, and toys. She has excellent memory, focus and problem-solving abilities well above average for her age and stage of development. The Tiffany puppies are appropriate in their interactions with one another, with cats, and other dogs. They are also socially appropriate in their interactions with people. Although they can be vocal during socially appropriate times and during playtime, it is easily managed and or redirected. Pink does use her mouth quite a lot to initiate and engage, but she has good bite inhibition. These puppies are all comfortable and tolerant of handling and restraint. They have no red flags and no possessiveness. Pink has mid to moderate energy. They are all playful, curious, and social. Overall these puppies are very engaging and eager, particularly Red, Pink and Orange. They have good potential for therapy work. They are bubbly, happy eager and engaging. They are personable and affectionate. These puppies are well-balanced and would do well in most any home.
