Individual Notes:

The Carley litter overall is confident and self-assured, although a couple puppies need a little time to adjust into new situations. These puppies show little to no stress in new situations, around new people or in circumstances typically considered stressful. These puppies react appropriately to new sites and sounds and they are curious and investigative. Blue has a good memory, focus and problem-solving abilities average for his age and stage of development. He has good motivation for interaction, food and toys at fairly equal and balanced levels. These puppies are socially appropriate in their interactions with one another, cats, and with other dogs. They are also socially appropriate in their interactions with people. These puppies do use their mouths somewhat to initiate/engage in play, but have excellent bite inhibition. They are rarely vocal. They are all comfortable and tolerant of handling and restraint.

These puppies have no red flags and show no possessiveness. These puppies are fairly consistent. They all have mid level energy. Overall, this litter is gentle and respectful. Pink and white need a little more time to adjust than the others but do adjust very well and on their own. These puppies are content to explore and play on their own while still being personable and engaging. They are curious, playful, social and happy. These puppies are well balanced and should adapt well into most any home, but will need time to adjust into new situations without being overwhelmed.

Health notes:

Blue has no Health Notes.
