

Evelyn Pink Temperament Test
D.O.B 3/30/24

Litter Video - <https://youtu.be/nlLvbX5x-eA>

Evelyn Pink came in with a nice confidence. She explored the new environment staying close to the same area.

She interacts appropriately with her littermates in new situations.

There was minimal stress shown when change was introduced and she showed minimal signs of stress with stressors like bathing and extra handling.

Evelyn Pink notices new sounds and new objects and slowly moves towards to investigate, tail up.

Her focus is good, she shows high interest in treats and no interest in toys. These qualities could be good for training.

She does attempts to problem solve but does give up after 1 minute. She needs minimal repeat to show improvement.

While exploring, Evelyn Pink does uses her mouth more than half the time to figure it out. Rarely uses her teeth and pressure is unnoticed.

She is rarely vocal in any situation.

Evelyn Pink is comfortable and tolerant of handling.

Evelyn Pink shows no possessiveness with litter mates.

The Evelyn litter has a mid-moderate energy level. Evelyn Pink gets excited with little effort and is just happy to be here. She enjoys interacting with the tester and has intermittent times of not.
