

## Janelle Red Temperament Assessment

Video - [https://youtu.be/h8TQRGVDE\\_A](https://youtu.be/h8TQRGVDE_A)

Janelle Red actively explores and she gets excited when put in new environments.

She has appropriate reactions to new situations.

She showed a good balance of independent play and engagement with tester.

When she is put in a new environment, there are no signs of stress. Just happy to be here.

When she is exposed to a stressor like a bath or medical treatment, she shows little to no stress.

When Janelle red was introduced to noises or startling sounds, she noticed the sound and quickly moved towards it to see where it came from.

She was curious when new objects were introduced and moved quickly to investigate.

Janelle red has good focus with the tester.

She also has a high interest in all treat rewards, which is another motivator for good training.

She is interested in toys and is motivated to play. She demonstrates a good balance of interacting with people and independent play.

She, along with several of her siblings are motivated to problem solve, and are persistent to try and figure things out.

She is not very mouthy, but will use her mouth half the time when trying to investigate something new.

During the test, she rarely vocalized in any situation.

She rarely uses his teeth to engage or explore but when she did, she left no marks on skin or damage to toys.

She is very polite with her interactions and displayed a gentle nature with tester.

When handled she was comfortable and tolerant.

She demonstrated no possessiveness with her siblings or the tester with toys or food.

Overall, Janelle red has a mid-moderate energy level. She is motivated to interact, train, and figure things out with little to no signs of stress in the process.

Loves independent play and human interaction. She is a happy and sweet puppy.
