7 Wk: Individual Notes:

The Mia litter overall is confident and self-assured, although a couple of puppies need a little time to adjust into new situations. They show little to no stress around new people or in circumstances typically considered stressful after they've been given a chance to adjust. These puppies are curious and investigative of new sites and sounds, including those that should be considered startling. These puppies overall have good memory and problem-solving abilities for their age and stage of development. They have good motivations for interaction, food, and toys at fairly equal and balanced levels. These puppies are socially appropriate in their interactions with other dogs and cats. They are also socially appropriate in their interactions with people. They do use their mouth to initiate or engage in play but they have excellent bite inhibition. They are vocal in socially appropriate situations but it is easily redirected. These puppies are all comfortable and tolerant of handling and restraint. They have no red flags and show no possessiveness. They all have mid to moderate energy. Red and Red Dot are a little timid to start, and are naturally gentle and respectful. They need a little time to adjust into new situations, but do so very well and on their own. The litter is content explore and play on their own well still being very personable and engaging. They are curious and playful. Red dot and Red will do best in homes that will allow them to adjust to things without being overwhelmed. The rest of the litter is very well balanced and should adapt well into most home.

Health notes: Red Dot has an underbite
