Individual Notes:

The Carmella litter overall is very confident and self-assured. They show no stress in new situations, around new people or in circumstances typically considered stressful. These puppies have very good motivation for interaction, food, and toys at fairly equal and balanced levels. They have excellent memory, focus, and problem-solving abilities above average for their age and stage of development. These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They are vocal in an effort to get your attention, but it does seem easily managed and/or redirected. These puppies do use their mouth to initiate or engage in play, but have excellent bite inhibition. These puppies are comfortable and tolerant of handling and restraint. They have no red flags and show no possessiveness. Side-by-side, Red Dot is a little more assertive than the rest of the litter. They all have moderate energy. These puppies are all very curious, social, and happy. They are eager and engaging. They are bubbly, social, playful, and curious. Pink Dot, Pink, and White are content to explore and play on their own, but would prefer to be with and around people. Red Dot is more independent than the rest of the litter. White, Blue and Red are well balanced, explore engagement, and should adapt to most home. Pink, Pink Dot, and White have potential for therapy work.
