### Liana Litter Overview:

The Liana litter is a delightful and fun group of puppies! They are sweet, happy, and eager to play, bringing joy to every interaction. Their confidence is impressive, especially for such young puppies, and they are socially appropriate and easy to handle. With mid-to-moderate energy levels, these puppies are smart, curious, and adaptable, making them well-suited for almost any home type. They are rarely vocal or mouthy, adding to their already charming temperaments.

---

### Liana Pink

- **Energy Level:** Mid-to-moderate
- **Personality:** Pink is confident, self-assured, and eager to play. She enjoys interacting with her littermates and has a fun, bouncy, and bubbly personality. She is naturally sweet and respectful, making her a delightful companion for any family.

---

### Liana Blue ; Enrolled into S.T.A.R Puppy Program 8 Weeks

- **Prep School Dates:** 2.27.25 - 4.24.25 (8 Weeks)
- **Energy Level:** Mid-to-moderate
- **Personality:** Blue is confident and self-assured. He enjoys interacting but is also content to explore on his own. While he can occasionally be vocal when unsure, this behavior is very slight and easily managed. His bright and engaging personality makes him a great choice for a *Star Puppy* 8-week candidate!

---

### Liana Green

- **Energy Level:** Mid-to-moderate
- **Personality:** Green is confident and interactive, with a great blend of independence and a desire for human interaction. He is self-assured and content to explore and play on his own, making him a versatile and well-balanced puppy.

---

### Liana Orange

- **Energy Level:** Mid-to-moderate
- **Personality:** Orange is confident, self-assured, and playful. He is eager to explore and loves playing with toys. He is slightly more independent than his siblings, but his engaging and curious nature makes him a wonderful addition to any home.

---

#### Health Notes:

- **Liana Blue & Orange:** Both puppies have an incredibly mild underbite that has been thoroughly evaluated and cleared by our veterinarian. It is expected that as they grow, this will most likely correct itself. Even if the underbite remains, it will be very minor and will not cause any pain, discomfort, or affect their daily life in any way.
- **Liana Green:** Green's teeth have not yet grown in, which is very common for puppies of this age and size. This is not a health concern, and his teeth are expected to come in as he continues to grow and develop.
