Janelle Boys Temperament Overview:

The Janelle litter overall is confident and self-assured. They are content to explore and play on their own but generally prefer to be with and around people. These puppies show little to no stress in new situations, around new people, or in circumstances typically considered stressful. They react appropriately to new sights and sounds and are naturally curious and investigative.

This litter demonstrates very good memory, focus, and problem-solving abilities for their age and stage of development. They also show strong motivation for both interaction and food, with a good interest in toys. The puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also well-mannered in their interactions with people. Some of the puppies may use their mouths to initiate or engage in play, but they exhibit excellent bite inhibition when they do. They are rarely vocal. All of the puppies are comfortable and tolerant of handling and restraint, and most actively seek out this kind of interaction.
