Jubilee Girls Temperament Overview:

The Jubilee litter is overall confident and self-assured. Unless otherwise noted, these puppies show little to no stress in new situations, around unfamiliar people, or in environments typically considered stressful. They are curious and investigative when exposed to new sights and sounds, including those that might be considered startling.

These puppies demonstrate memory, focus, and problem-solving abilities that are appropriate for their age and stage of development. They have strong motivation for interaction and show a healthy interest in both food and toys. Socially, they are well-mannered in their interactions—with one another, with cats, and with other dogs. They are also appropriate and respectful in their engagement with people.

While they may use their mouths to initiate or engage in play, their bite inhibition is very good. They are rarely vocal, and no red flags or signs of possessiveness were observed.

This entire litter is highly intuitive and people-oriented, making them excellent candidates for therapy or emotional support work. This whole litter shows strong potential in this area.
