### Juniper Litter Temperament Overview:

The Juniper litter overall is confident and self-assured, although a couple of puppies needed a little time to adjust into new situations. They show little to no stress in situations around new people, or in circumstances typically considered stressful. These puppies have excellent motivation for interaction and very good motivation for food. They're interested in toys. They have very good memory, focus, and problem-solving abilities well above average for their age and stage of development.

These puppies were socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth to initiate and engage in play somewhat, but have excellent bite inhibition and they are rarely vocal. These puppies were all comfortable and tolerant of handling and restraint. Most of them actively seek out this type of interaction. A couple of the puppies border on pushy in their effort to get attention. This litter overall is fairly consistent. They have no red flags and show no possessiveness.
