Lilith Litter Temperament Overview:

The Lilith litter overall is confident and self-assured after a little time to adjust into a new situation. They show some stress in new situations, around new people, and in circumstances that are typically considered stressful. They do recover and adapt well on their own. These puppies are curious and investigative with new sights and sounds, including those that should be considered startling. They recover quickly if they become startled. These puppies have a good memory, focus, and problem-solving abilities, average to their age and stage of development. They have good motivations for interaction, food, and toys at fairly equal and balanced levels.

These puppies overall are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They rarely use their mouth to initiate or engage in play and have excellent bite inhibition if they do. They are rarely vocal. They have no red flags and show no possessiveness and are all comfortable and tolerant of handling and restraint. These puppies are fairly consistent with subtle differences between individuals.
