### Paprika Boys Temperament Overview:

The Paprika litter overall is confident and self-assured, although they need a little time to adjust into a new situation. Once they have adjusted, they are curious and investigative with new sights and sounds, including those that should be considered startling. These puppies have good memory, focus, and problem-solving abilities, average to their age and stage of development. They also have good motivations for interaction, food, and toys at fairly equal and balanced levels.

These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth somewhat to initiate or engage and play, but have very good bite inhibition and seem to be easily redirected when needed. These puppies have no red flags and show no possessiveness. Overall they are very comfortable and tolerant of handling and restraint. Most of these puppies actively seek out this type of interaction. These puppies are fairly consistent.
