### Posy Boys Temperament Overview:

The Posy litter overall is confident and self assured. They show no stress in new situations, around new people, or in circumstances typically considered stressful. These puppies react appropriately to new sights and sounds, being curious and investigative even with those that should be considered startling. These puppies have outstanding memory, focus, and problem-solving abilities for their age and stage of development. They also have excellent motivation for interaction and food and good motivation for toys.

These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They are rarely vocal and unless otherwise noted, rarely use their mouth to initiate or engage and play. They have very good bite inhibition if they do use their mouth to initiate or engage in play. These puppies have no red flags and show no possessiveness. They are fairly consistent with subtle differences between individuals.

---

### Posy Blue

- **Energy Level:** Moderate
