Simone Boys Temperament Overview:

The Simone litter overall is confident and self-assured. They show no stress in new situations, around new people, or in circumstances typically considered stressful. They react appropriately to new sights and sounds, being curious and investigative. These puppies have very good memory, focus, and problem-solving abilities for their age and stage of development. They also have excellent motivation for food, good motivation for interaction, and good interest in toys.

These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth somewhat to initiate or engage in play, but have excellent bite inhibition. These puppies are vocal only in socially appropriate situations or when trying to initiate engagement. They have no red flags and show no possessiveness. They are very consistent from puppy to puppy, their differences being subtle at best. This is a great litter where you can genuinely select based on how the puppy looks or the size because from a temperament standpoint, they are very similar.
