Simone Girls Temperament Overview:

The Simone litter is confident and self-assured. These puppies show no signs of stress in new situations, around unfamiliar people, or in environments typically considered stressful. They react appropriately to new sights and sounds with curiosity and an investigative nature. At this stage of development, the puppies demonstrate very good memory, focus, and problem-solving abilities appropriate for their age. They have excellent motivation for food, good motivation for interaction, and a healthy interest in toys.

Socially, they are appropriate in their interactions with one another, with cats, with other dogs, and with people. While they may use their mouths somewhat to initiate or engage in play, they have excellent bite inhibition. They are only vocal in socially appropriate situations or when trying to initiate engagement. No red flags or signs of possessiveness were observed.

The puppies are very consistent in temperament, with only subtle differences between them. This is a well-balanced litter where selections can confidently be made based on appearance or size, as their temperaments are remarkably similar.
