Jamie Girls Temperament Overview:

The Jamie litter is overall very confident and self-assured. They show no signs of stress in new situations, around unfamiliar people, or in environments typically considered stressful. These puppies demonstrate good memory, focus, and problem-solving abilities—slightly above average for their age and stage of development. They show excellent motivation for interaction and food, and have good motivation for toys as well.

Socially, they are appropriate in their interactions—with each other, with cats and other dogs, and with people. They rarely use their mouths to initiate or engage in play, and when they do, they show excellent bite inhibition. They are also rarely vocal. The puppies are comfortable with and tolerant of handling and restraint. They show no red flags or signs of possessiveness. Overall, this is a consistent and well-balanced litter, with only subtle differences between individuals.
